AI fair usage limits

To ensure reliability of our AI features, we manage usage through fair usage limits. If your usage reaches a limit, you may find your usage temporarily restricted.

This approach is designed to maintain system performance and reliability, while supporting your continued usage of our AI features.

This page tells you the limits set per account for each AI feature. We keep these limits under constant review, and may update them at any time by updating this page.

AI Review

This feature allows Juro users to use a contract review agent to review and mark up a contract against a user-defined playbook.

- 10 reviews every 2 hours

AI Extract

This feature allows Juro users to extract smartfield data from contracts using AI.

- 200 documents per bulk AI Extract
- No current limits on individual document AI Extract

AI Assistant

This feature allows Juro users to query, summarize and draft contract provisions using AI

- No current limits
